## Divisor Summation

Given a natural number $\mathrm{n}(1<=\mathrm{n}<=500000)$, please output the summation of all its proper divisors.

Definition: A proper divisor of a natural number is the divisor that is strictly less than the number.
e.g. number 20 has 5 proper divisors: $1,2,4,5,10$, and the divisor summation is: $1+2+4+5+$ $10=22$.

## Input

An integer stating the number of test cases (equal to about 200000), and that many lines follow, each containing one integer between 1 and 500000 inclusive.

## Output

One integer each line: the divisor summation of the integer given respectively.

## Example

## Sample Input:

3
2
10
20
Sample Output:
1
8
22
